((CENTRIC))

Operational Excellence

We ensure a holistic focus on people, process, information, and technology

Our Supply Chain Practice

With Centric as a cost-effective partner, organizations have driven **operational efficiency**, improved **customer service**, increased **profitability** and reduced **risk** with a more enhanced focus on their Supply Chain.

We have a deep understanding of the **components** of **supply chain**, and it's **best practices** and bring that **knowledge** and **expertise** to each of our engagements.

Balancing 3 key Focal Points

Responsiveness
How well do you satisfy your customers' needs?

Efficiency
How well do you minimize needed resources to produce and deliver?

Resilience
How well do we adapt and recover from disruptions?

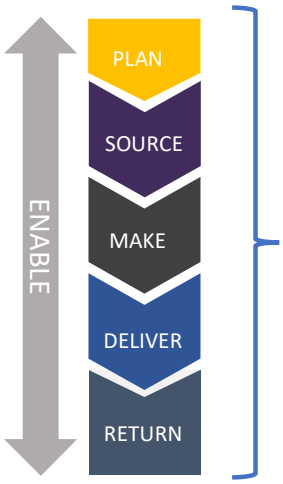
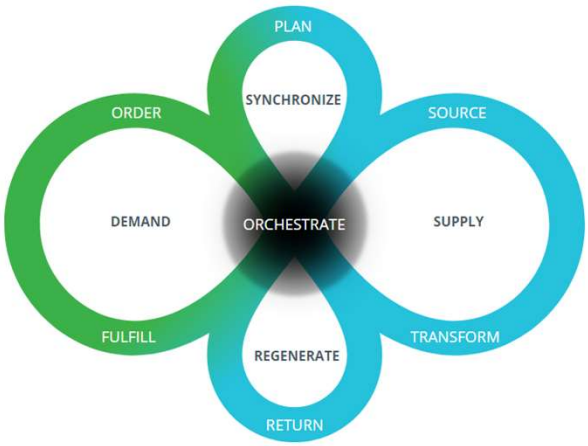
Traditional



Modern



THE SCOR MODEL

To align our efforts, Centric references the industry standard Association for Supply Chain Management (ASCM) Supply Chain Operations Reference (SCOR) Digital Standard model which describes the business activities associated with all phases involved in satisfying a customer's demand.

The newly updated SCOR Model uses an infinity loop diagram to illustrate supply chains are an ever-moving series of activities, with no artificial starts or stops from process to process.

Drive Change and Deliver Value
